Kristen,

Here are the lab sheets for the private well sampling. There were no detects except for lead, which was low.

We can discuss later when we talk on the phone.

Subject: Tower private well sampling results

Bob,

Attached you should find the lab reports from Pace for the Tower private well sampling. The data got split into four different reports. The first batch of samples was sent in two coolers so each was assigned a lab work order. The other two batches of samples were collected by Kristin on different days.

Let me know if you have any questions.
